MODULAR BUILD SYSTEM (IMPORTANT FOR MACHINE LOGIC)

You basically have this logic:

BASE

- Espresso
- Matcha

LIQUID

- Water
- Milk (Cow / Oat – powdered)

STYLE

- Hot
- Iced

FLAVOR

- Vanilla
- Caramel
- Strawberry
- Mango
- Taro
- Shoyu Caramel

So one drink =

[Base] + [Liquid] + [Style] + [Flavour]

Example:

Iced Taro Matcha Latte

→ Matcha powder + Taro powder/syrup + Milk powder + Water + Ice
